1 2 3 4 5 6 7 8 9 10 11 12 13 15 Summary 16 www.fortinet.com/FortiGate/FortiWiFi@-60D-Series Integrated Threat Management for Small Networks The FortiGate/FortiWiFi-60D series are compact, all-in-one security devices that provide Fortinet's connected UTM. Ideal for small businesses, remote and local customer equipment (CPE), and retail networks, these accessories provide the network security, connectivity, and performance you need at a single low price per device. Strong security and wireless connectivity You can achieve strong threat protection, including firewalls, application control, advanced threat protection, IPS, VPN, and web filtering, all from a single device that is easy to deploy and manage. With our fortiguard® services, you'll have automated protection against today's sophisticated threats. Reduce the need for additional wireless access points by integrating a high-bandwidth fat-client into your FortiGate with strongWiFi-60D. It's also a great option to protect mobile devices in BYOD environments with automatic device identification and customizable access and security policies. Fortigate/FortiWiFi-60D virtual machines allow you to segment networks to allow guest and employee access or protect items such as cardholder data. Get the flexibility to meet your business needs and meet compliance standards like PCI and HIPAA. All-in-one high-performance network security Built on the basis of the FortiASIC system on 2 chips (SoC2) and FortiOS 5, the 60D series provides an integrated set of essential security technologies to protect all applications and data. Get the best firewall in the industry and the latest in Advanced Threat Protection, Intrusion Protection, Web Filtering, and many new features like sandboxing, feature selection options to simplify configurations and deployments, and contextual visibility for advanced reporting and management. Easy-to-implement and manage enterprise class security• 1.5Gbps throughput performance ensures network security is not a bottleneck• Built-in switch and PoE options simplify network infrastructure• Up to 2 WAN interface ports, 7x LAN and DMZ 1x (2 Power Over Ethernet ports on POE models)• Works on FortiOS 5: The world's most powerful security operating system provides more security to combat advanced threats, more control to protect mobile devices and more intelligence to create secure policies Key features & Benefits Unified protection Multi-threat protection from a single device increases security and reduces costs Simplified renaming Unlimited user licenses and full functionality Network interface multiport network and optional wireless connectivity enable data segmentation for compliance and flexible deployment FortiCare Worldwide 24x7 Support support.fortinet.com FortiGuard Threat Research & Response www.fortiguard.com This website or its third-party tools use cookies, which are necessary for its operation and necessary to reach reach objectives set out in the cookie policy.
